Pool & Spa 2" PVC Hydrostatic Test Kit

In-stock and ready for delivery at competitive pricing

The Harrington PVC Pressure test kit is used to run hydrostatic tests to determine if a piping system has leaks. Typical applications include pool and spa installations. When used properly, this low-cost test kit will indicate if your system is leak-free, leaving you with the confidence of a job well done. Don't risk potential long-term problems, use the Pressure Test Kit (Harrington PTK) to eliminate them today.
