

HARRINGTON[®]

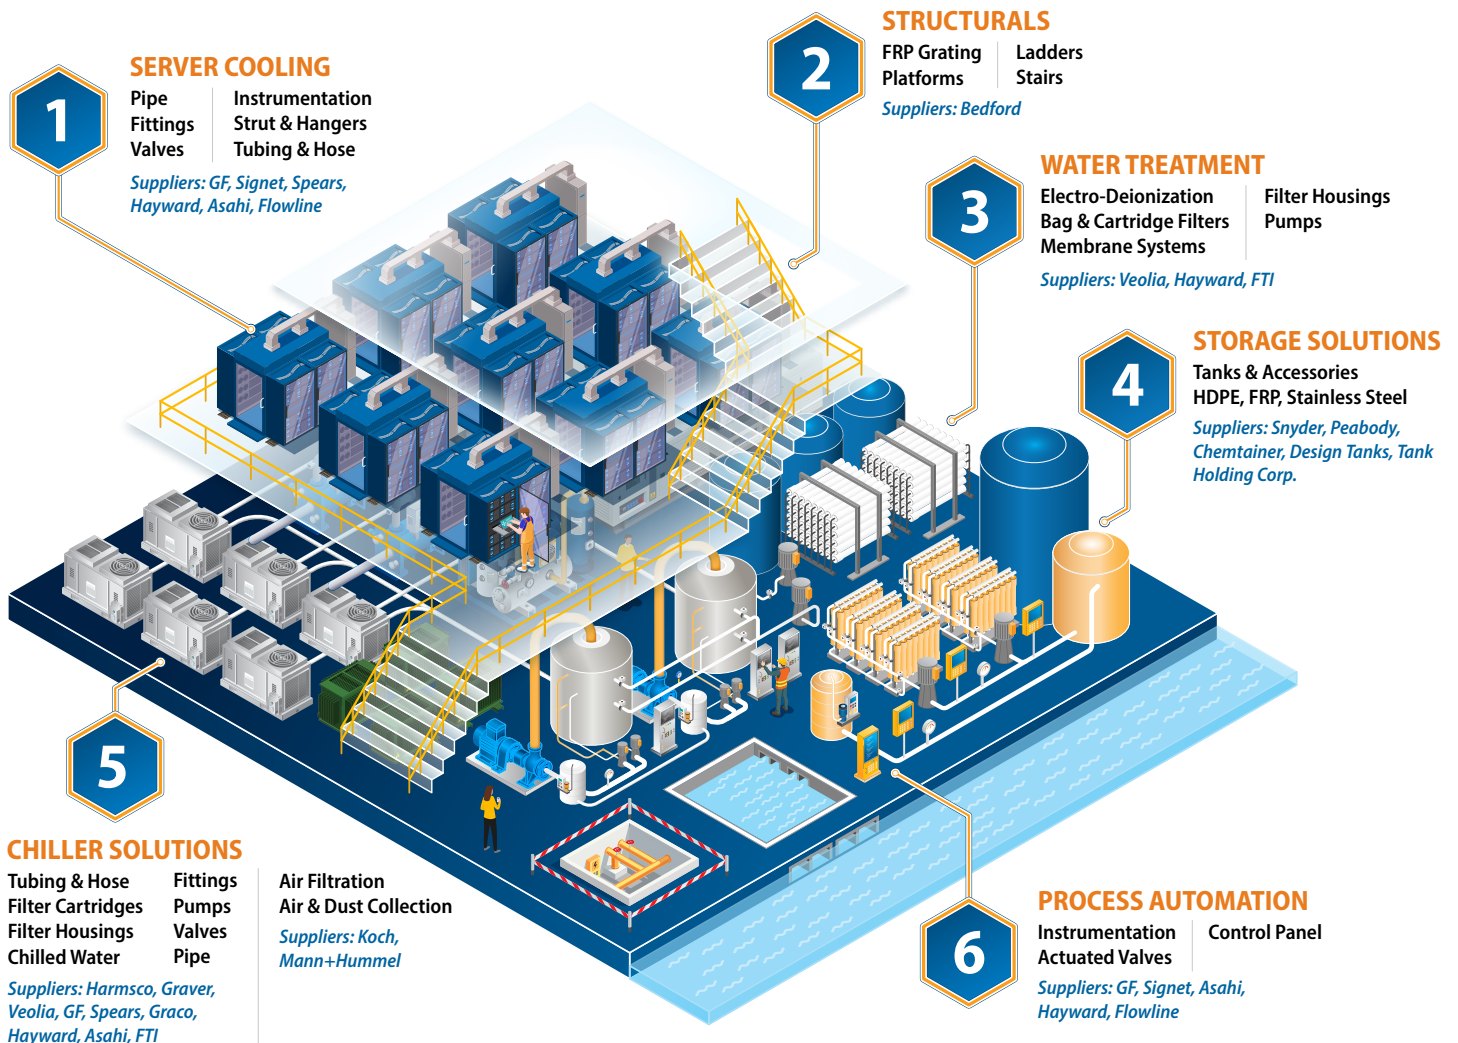

Process Solutions since 1959

EXPERTISE YOU CAN COUNT ON.
Support You Can Trust.

Why Partner with Harrington?

When Downtime Isn't an Option...

As the data center landscape continues to expand, so do the challenges of managing its operations. Harrington provides a comprehensive suite of solutions designed to enhance performance, reduce downtime, and maximize efficiency. When downtime isn't an option, you need a partner who can support your critical needs.

Advanced Fluid Management Solutions for Data Centers

Harrington delivers engineered fluid handling systems designed to support cooling, water management, and sustainability in mission-critical data center environments. Harrington provides a comprehensive range of piping systems and accessories designed for the demanding needs of fluid transport in data centers.

PIPING SYSTEMS | High-Performance Materials for Cooling & Water Transfer

Our product line includes PPR-CT, PVC, CPVC, stainless steel, and carbon steel—carefully selected for their durability, corrosion resistance, and superior thermal performance—ensuring reliable operation under thermal stress, minimal maintenance needs, and consistently high system uptime.

SUPPORTING PRODUCTS:

- Pipe hangers & supports
- Expansion control solutions
- Professional installation tools

TANKS | Storage Solutions for Cooling, Reuse & Emergency Supply

Harrington offers FRP, stainless steel, and PE tanks designed for chemical compatibility and environmental compliance, with above- and below-ground options in a range of sizes for lasting performance — including customized configurations to meet various requirements.

COMMON USES:

- Chilled water & TES systems
- Water reclamation & treatment
- Fire protection & backup supply

PUMPS | Precision Flow Control for Efficiency & Reliable Uptime

Our comprehensive range of pumps includes centrifugal, diaphragm, metering, and self-priming models — engineered for energy efficiency, 24/7 operational reliability, and smooth, consistent performance even in the most demanding industrial environments.

IDEAL FOR:

- Chilled water circulation
- Emergency backup flow
- Coolant and chemical transfer

FILTERS & HOUSINGS | Enhanced Fluid Quality & System Longevity

Protect your cooling and treatment systems with Harrington's high-performance filters and housings — renowned for exceptional quality and specifically designed to reduce equipment wear, enhance fluid quality, and support long-term environmental compliance.

FILTRATION SOLUTIONS, INCLUDING:

- Corrosion-resistant options (SS, PVC, PP)
- High-flow & multi-round housings
- Ro Systems and membranes
- Cartridge & bag filters

INSTRUMENTATION | Precision Monitoring & Control for Critical Systems

Harrington offers a comprehensive range of instrumentation solutions to support fluid management, automation, and compliance in data centers. These solutions improve visibility, enhance system response, and ensure regulatory and performance compliance.

OUR PRODUCT OFFERING INCLUDES:

- Level sensors – Monitor tank capacity and emergency reserves
- Pressure & temperature gauges – Maintains system stability and safety throughout your facility
- Flow meters – Precisely track coolant and process fluid movement
- Control panels & automation – Enable remote monitoring and system optimization

HARRINGTON

Process Solutions since 1959

The Harrington Group

ONE TEAM. MANY STRENGTHS.

At Harrington, our strength lies in the combined expertise of our family of companies: Aetna Plastics Fabrication, Cortrol, Crist Group, Fluid Gauge, J2 Resources, and PumpMan — that's the Harrington Group. Together, we deliver tailored, high-impact solutions that go beyond products, focusing on collaboration and long-term operational success.

Let's Boost Your Performance!

When you choose Harrington, you gain access to decades of expertise, innovative solutions from trusted brand, and a commitment to helping you achieve your process goals. Let us help you reduce costs, improve performance, and drive sustainability in your operations.

Get expert guidance for your data center infrastructure needs — Contact Harrington Today.
